

What is important to you...?

How can we improve...?

Where do we need to go...?

- These are questions the County Commissioners and the BCPC are seeking answers to in preparation for the **Bucks2040** Comprehensive Plan update.
- In the Summer of 2021, 4,500 surveys were mailed to randomly selected households across the entire county. The six-page survey was administered by ETC Institute and asked questions focusing on...
 - **Quality of life**
 - **Residents' vision for the future of the county**
 - **Delivery of county services**

Of those 4,500 surveys, a sampling of 1,000 responses were collected from the three parts of the county—upper Bucks, central Bucks and lower Bucks—to create a statistically-valid and geographically-representative analysis.

ETC has produced an executive summary and an immersive, web-based dashboard, which can be explored to review the responses collected and sampled. We are pleased to present the results, and we expect this dashboard to be an invaluable tool in evaluating county services and crafting the vision and direction of the Bucks2040 comprehensive plan.
